

Midterm Ops 401d6

Agenda

1. Team Member Introductions
2. Problem Domain & Project Overview
3. Team Process & Documentation
4. Application Demonstration
5. Q&A

Our Team

Dericus Horner

Anthony Wall

Geneva Knott

Alexander Echols

Dylan Dempsey

Dylan Dempsey

Dylan Dempsey | LinkedIn

- Navy Veteran (STG2)
- Security Clearance
- Real Estate Agent/Investor
- Expert at identifying risks and opportunities

Alexander Echols

- Co Founder of Cyber Guardians
- Cybersecurity Professional
- Physical penetration tester
- ITF+ Certified
- Does various accents

Linked 

Dericus Horner

- **US Army Veteran**
- **Master's degree in Business Administration**
- **Current IT Property Specialist**
- **Detail Oriented/Critical Thinker**

Connect With Me
LinkedIn in

Geneva Knott

- Marine Corps Veteran- 0621 Communications
- 9 yo LE/Criminal Investigator -Violent Crimes w/ Bachelors in Criminal Justice
- working on Associates in Cyber Defense

Linked in

Anthony G Wall

- Persistent and Goal Oriented
- Former USMC Infantry team leader
- Licensed and registered Loan officer
- CompTIA ITF+ Certified
- Aspiring cyber security professional

Problem Domain

Cyber Guardians has been contracted to improve the cybersecurity processes and systems for the clients company.

Focuses include:

- Logging-Cloud Trail
- Monitoring-Cloud Watch
- Detection of adversarial activity on cloud infrastructure.

How we Met Compliance?

- CIS-compliant Windows Server DC hosted on a private subnet of a VPC and accessible only via VPN tunneling
- CIS-compliant Data Server

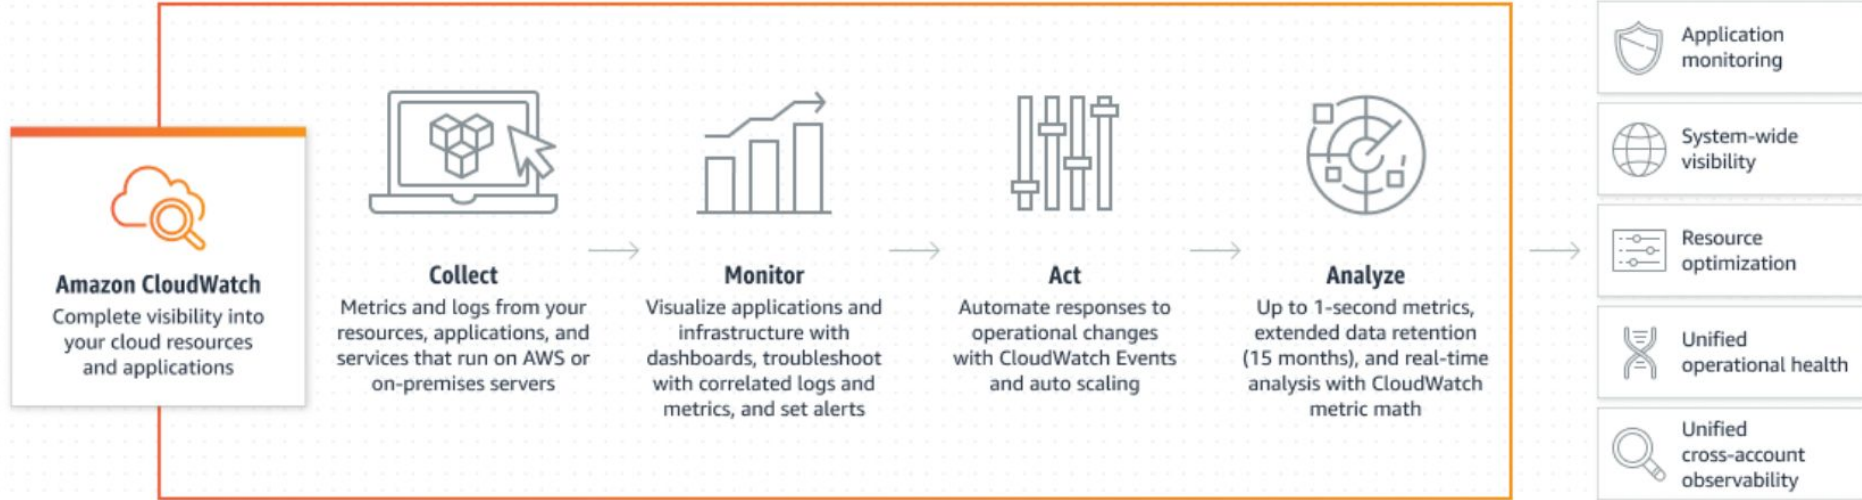

Security systems requirements

- Identity and Access Management (IAM)
- Network and Infrastructure Security
- Data Protection and Encryption
- Security Monitoring and Incident Response
- Security Auditing and Compliance
- Vulnerability Management and Patching
- Secure Configuration Management

Launch Announcements

Analyze, search, and explore your logs with [CloudWatch Logs Insights](#). Set [alarms using metric math expressions](#) to be proactively informed of potential issues. Use [Automatic Dashboards](#) to explore account and resource-based views of metrics and alarms, and drill down to understand the root cause of performance issues. [Send us feedback](#).

AWS CloudTrail

Introducing CloudTrail Lake

CloudTrail Lake lets you query multiple event fields in your logs, across all regions, for auditing and analysis. [Learn more](#)

CloudTrail > Event history

Event history (50+) Info

Event history shows you the last 90 days of management events.

Dashboard

The AWS CloudTrail dashboard displays an overview of your trails and recent events. If you have [CloudTrail Insights](#) enabled on at least one trail, and CloudTrail has logged any Insights events, the Insights area shows the five most recent Insights events. The **Event history** area shows you the most recent management events that have occurred, even if you do not have trails configured.

From the dashboard, you can open the **Event history**, **Insights**, or **Trails** pages to see more of your events and trails. You can also start creating a trail, or enable Insights events.
